

The Center for Advanced Dentistry is proud to announce our new program...

“WHITER, BRIGHTER TEETH FOR LIFE”

This program allows you to continue to whiten your teeth all year long. This is the same type of whitening we have used for the last 20 years. Here is how it works.

- 1.** First time teeth whitening: For an investment of \$ 199.00 (normally \$399.00) you will receive trays and a complete whitening kit for use at home. This kit includes custom made whitening trays and 3 syringes of whitening gel. In addition you will receive 2 syringes of whitening gel FREE at each of your routine preventative cleaning appointments for life!
- 2. The only condition is that you MUST come in every six months for your recare appointment!**
- 3.** For our family of patients who have already initially whitened their teeth and have custom trays, we will also provide you with 2 tubes of whitening gel FREE at your dental cleaning appointment by keeping your preventative dental care appointments with us every 6 months.
- 4.** If you do not have custom whitening trays and you completed the in-office whitening procedure, we will make custom trays for you at a minimal charge of \$99.00 (materials only) and you will initially receive 2 syringes of whitening gel and be enrolled in our program “WHITENING FOR LIFE” by keeping your cleaning appointment every 6 months.

A dental examination performed by Dr. Hornstein is necessary to determine if you are eligible to participate in our program. The circumstances that could prevent you from participating are: Periodontal Disease, Pregnancy, Dental decay, A history of extreme sensitivity from past dental whitening procedures, Crowns, Veneers or fillings on your front teeth.

If you have any questions about our “Whiter, Brighter Teeth for Life” program, please contact our office at (216) 595-1710.
